EURO+ is a double or triple-seal system, 6-chambers, with very good thermal and acoustic properties. Made of extremely white PVC. Created for window manufacturers who export their products to Western European countries.

It has all the profiles needed for use in landmarked buildings where windows need to be replaced. Functional and easy to install. Euro+ is a system that meets all requirements, even those of the most demanding customers.

Double-seal profile

Triple-seal profile

- Decco Euro+ profiles designed for the production of windows dedicated to different European markets
- Three types of renovation subframes, including one with a center seal
- „French window” system - with handle in the middle of the assembly with sash stop
- Ledges embedded in traditional subframes and renovation subframes
- Additional system components: narrow movable pillar, drip on the sash
- Masking profiles in different sizes: flat bars, angle bars, chamber slats.
- Profiles in pure white color
- A wide range of decorative foils
- Seals in gray or black
- The core of the profile matching the color of decorative foils.
- The offer includes three core colors: white, caramel, and dark brown

Thermal properties

Due to the printing technology, colors are similar to the original ones
