Introducing the Decco SLIDE system. This is a new alternative solution in the segment of sliding doors and windows. It is an excellent alternative to the PSK- or HST-type terrace doors. The SLIDE system is perfect for family houses and for public buildings. The great advantages of the SLIDE system are tightness, reliability and ease of use.

Profile benefits:

- Leaf depth – 81 mm
- Frame depth – 157.5 mm
- Possibility of glazing with packages up to 52 mm
- High rigidity reinforcements in leaves
- Two types of fixed mullion from Decco 82 system (wide static and standard)
- Designed to work with Roto and Hautau door furniture
- Option of pre-joining of profiles for window manufacturers
- Available in scheme A
