

Warm threshold

Aquatherm

Warm threshold is, in a nutshell, the entire door and balcony structure sealing system consisting of threshold profiles, drip caps, draught excluders and accessories (threshold connectors, drip ends).

AQUATHERM

- Modern and original shape of threshold and drip profiles
- Very low threshold – only 20mm high
- The threshold consists of an aluminum part and a warm PVC part
- Effective drainage of the threshold
- Up to five brush gaskets can be used in drip in different places, creating the best combinations of waterproof and airtight.
- Dedicated threshold connectors for the Decco 71, Decco 82 and Decco 83 systems (for both window and door frames)
- The connectors are equipped with an aluminum securing element exceptionally high strength of the door frame/threshold connection, which ensures very high stability of the structure during transport and assembly

waterproof
